DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2, 4, 5, 13, 15, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Burke, US #5,253,608.

3. Burke discloses a flag including an attachment side with linear hemmed sleeve 23, plastic tubular insert 16 (Figure 2) and flexible, bendable extension tabs 21. Tabs 21 are secured to the sleeve and have openings therein for supporting the flag on pole 12. Claim limitations regarding the pole have been considered, however since the pole is not part of the claimed invention, these limitations are considered to be intended use only.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burke.

Art Unit: 3611

6. Burke does not specifically teach sewing as a method for attaching the sleeve to the flag. The method of forming the device is not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight.

7. Claims 3 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burke in view of Schultz, US #6,748,683.

8. Burke does not teach using grommets, however, this is well known in the art of flags, as shown by Schultz. Schultz teaches a flag having grommets 26 (Figure 3) at attachment points. It would have been obvious to a person having ordinary skill in the art to utilize grommets to prevent the tabs from wearing out during use.

Allowable Subject Matter

1. Claim 7 is allowed.

2. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

3. Applicant's arguments filed 7 July 2005 have been fully considered but they are not persuasive.

4. New rejections have been made in response to Applicant's amendments to the claims.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3611

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
